

Policy Type:	300 Transportation
Policy Title:	03 Approach Widening
Authority:	
Resolution 100-09	

Applications for widening of existing approaches must be made in writing to the R.M. Office.

The Councillor in whose division the application originates shall review the request in consultation with the R.M. Administrator. If the application meets policy guidelines, the Administrator shall issue approval to construct and provide written notice to the applicant.

Any applications that, in the opinion of the Councillor and Administrator, deviate significantly from this policy, are to be considered discretionary and subject to approval by Council.

The cost of culvert extensions, where necessary for approach widening, shall be the responsibility of the applicant. The R.M. shall, at the request of the applicant, supply culvert extensions at cost.

At the applicant's request, the division Councillor may make appropriate arrangements with the maintenance department to widen an existing approach. Construction costs will be the responsibility of the applicant and will be invoiced to the applicant at current R.M. rates for custom work.

While the R.M. is constructing or reconstruction a road within the municipality, the approaches along the road may, at Council's discretion, be widened by the R.M. maintenance department of Council's designated contractor.
