Clubroot Survey

In 2018 there was an extensive survey completed to detect Clubroot, or the symptoms of Clubroot, in the province of Saskatchewan. The report, released in January 2019, states that there are no symptoms of the disease in the RM of Beaver River; although there has been findings in the adjoining municipalities.

We ask that our ratepayers remain vigilant in hopes that this pathogen does not reach our area.

For more information on Clubroot please visit:
