### PROPERTY ASSESSMENT DOES NOT EQUAL PROPERTY TAX

SAMA's role in determining assessed value for properties is just the first part of a process established by provincial legislation. The second part is application of provincial government established tax policy, such as property classes and percentage of value, and statutory exemptions. The third and final part of the process involves municipalities annually determining the local mill rate based on local budget needs. The province sets the mill rate for the education sector. Municipalities then multiply the taxable assessment by the local mill rate to produce property tax levies, also known as your property tax bill.

**\*\*Please note: The only time you can appeal is now until June 21 on your property tax assessment, you CANNOT appeal your tax bill.\*\***

Provincial legislation requires all properties in Saskatchewan be revalued once every four years. For the 2021 revaluation, the base date used for assessment values is January 1, 2019. This ensures assessed values are more current, as property values change over time.

No other month in the year begins on the same day of the week as June.

June has both the longest and the shortest days of the year, depending on where you're standing! If you live in the northern hemisphere, then June 21st is the longest day of the year. If you live in the southern hemisphere, then the 21st is the shortest day of the year.

The first day of summer in the northern hemisphere is June 21st.

The birth flowers of June are the honeysuckle and the rose. Both of these flowers are symbols of all things relating to love, desire, generosity, and affection. If you were born in June, then there's a good chance you'll be a bit of a hopeless romantic!
