

INSPECTION + AUDITING
EMERGENCY RESPONSE
CONSULTING
RESEARCH

Good Day,

My name is Tiffanie Bint, Consulting Utility Forester for CNUC of Canada. CNUC is conducting assessments of vegetation on behalf of SaskPower along the high voltage powerlines for the circuit BLU-512 in the RM of Beaver River No. 622 and the village of Pierceland. I will be conducting an inventory of all required vegetation maintenance on this circuit. I will be notifying all affected landowners of SaskPower's vegetation maintenance plans on their property(s).

I will be starting my vegetation assessment on May 8, 2023, and estimate that we will be completed our field work by May 19, 2023. I will follow-up with an email when we have completed my field work.

I will be driving a white Ford F-150 with CNUC logos on the side.

If you have any questions, please do not hesitate to call, or email me at the contact information below. Alternatively, if I can not be reach, please call Chris Proulx, CNUC Assessment Supervisor at 306-209-3370.

Thank you,

Tiffanie Bint
