

Policy Type:	300 Transportation Services
Policy Title:	20 Lauman's Landing Wastewater Spreading as a Form of Dust Control Policy

Authority:	
Council Resolution # 232-18	
Revised # 247-23	

**Policy Objective:**

1. To establish criterions for the disposal of Lauman's Landing water treatment plant process wastewater as a form of dust control in a matter as set out by council.

**Policy:**

1. The contractor shall dispose of water treatment process wastewater in accordance to the following:
  - On Rural Municipality of Beaver River No. 622 owned roads as identified in Appendix C of the Permit to Operate a Waterworks ONLY;
  - Commencing May 1<sup>st</sup> through to November 1<sup>st</sup> yearly (at Councils discretion). Any wastewater disposed of outside of the provided dates shall haul and dump at the RM of Beaver River's Municipal Lagoon;
  - At the discretion of the Municipal Administrator;
  - During dry conditions ONLY. The wastewater is to be disposed of in a manner that minimizes pooling or runoff to water wells, watercourse, waterbodies, surface drainage patters, or sloughs;
  - The water treatment plant wastewater is not to be mixed with liquid domestic waste and hazardous substances, unless it can be verified that the tank and spreader system has been sanitized prior to collection and disposal.
  - Contractor shall keep detailed records of wastewater spreading including dates, volumes, and locations. Records are to be submitted to the RM Office monthly.
