To Ratepayers of Rural Municipality of Beaver River No. 622

Re: Calcium Chloride application for dust control

The R.M. has been discussing the feasibility of applying calcium chloride to roads for dust control. This would involve one application of calcium chloride at a rate of 400m x 5m x 2L. Cost for the chloride would be \$1,600.00, with the R.M. paying for 50% and the ratepayer paying the other 50%. The required fees will have to be paid for in advance by the ratepayer if they want the service.

If the project goes ahead, it would be done in the spring/summer of 2026.

Please contact the R.M. office to let us know your thoughts on this service by contacting any of the following
